

James Nguyen

- Software Developer & 3D Animator -

Los Angeles, CA 90032

(626)-227- 4099 | nguyejames03@gmail.com | [Portfolio](#) | [LinkedIn](#)

EDUCATION

California State University, Los Angeles

Expected Graduation : May 2026

Bachelor of Science - Computer Science

GPA: 3.8

Relevant Courses: 3D Animation, Software Engineering, Analysis of Algorithms, Database Systems, Data Structures, Web Programming, Networking Protocols

Organizations: Association For Computing Machinery, Gravitas Animation Society

SOFTWARE ENGINEERING EXPERIENCE

Bureau of Engineering - City of Los Angeles | Engineering Intern

Sept. 2025 - Present

Python, PyTorch, ROS

- Achieved 98% pixel accuracy developing a UNet-based semantic segmentation model to detect sidewalk defects from rover LiDAR imagery, improving city infrastructure maintenance.
- Preparing and labeling datasets to train and evaluate deep learning models for defect detection.
- Collaborating with electrical engineers to experiment with hardware sensors, identifying signals that produce meaningful terrain data for the rover.

2D Cafe Game | Team Programmer

Jun. 2024 - Nov. 2024

C#, Unity, Unity Test Framework (UTF), PerForce

- Built core gameplay mechanics, in-game menus, and asset integration for a 2D cafe simulation.
- Coordinated weekly sprints and reviews, ensuring design alignment and timely feature delivery.
- Implemented UI and interactive elements, improving player usability and engagement.

Badminton Court Reservation System | Full-Stack Developer

Sept. 2023 - Jan. 2024

Spring Boot, React, PostgreSQL, Postman, Heroku, Jira

- Led Agile development and sprint planning with Jira Scrum reducing project timeline by 40%.
- Built a full-stack badminton gym web app enabling user account management and court bookings.
- Implemented ARIES-based recovery to ensure data consistency for transactional operations.
- Integrated Stripe payment processing to support memberships and reservation transactions, handling secure checkout flows and payment confirmation.

TECHNICAL PROJECTS

Maya -> Unreal FBX Exporter Tool | Pipeline Project

Jan. 2026

Python, Autodesk Maya API, Unreal Engine 5

- Built a Python tool automating FBX export from Maya to Unreal Engine.
- Automated batch export of 3D meshes while preserving naming conventions.

Distributed Routing System | Networking Project

Dec. 2024

Python, UDP, Bellman-Ford Algorithm

- Simulated distributed routing across multiple nodes, calculating shortest paths dynamically.
- Built real-time UDP communication for routing updates between devices.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, Golang, TypeScript, Kotlin, SQL

Games / Graphics Tools: Unity, Unreal Engine 5, Autodesk Maya, Adobe Suite

Frameworks: React.js, Next.js, Node.js, Spring Boot, FastAPI, Svelte, PyTorch

Tools: Git, Jira, Figma, VS Code, Eclipse, IntelliJ IDEA, Postman, Selenium
