

James Nguyen

- Software Engineer & Animator -

Los Angeles, CA 90032

+1 626-227-4099 • nguyejames03@gmail.com • www.nguyenjames.me

EDUCATION

California State University, Los Angeles

Expected Graduation : May 2026

Bachelor of Science - Computer Science

GPA: 3.8

Relevant Courses: 3D Animation, Software Engineering, Analysis of Algorithms, Database Systems, Data Structures, Web Programming, Networking Protocols

Organizations: Association For Computing Machinery, Gravitas Animation Society

SOFTWARE ENGINEERING EXPERIENCE

Bureau of Engineering | Engineering Intern

Sept. 2025 - Present

Python, PyTorch, ROS

Los Angeles, CA

- Developing a UNet-based semantic segmentation model to detect horizontal/vertical displacement and cracks in sidewalks from rover LiDAR camera imagery.
- Preparing and labeling datasets to train and evaluate deep learning models for defect detection.
- Integrating vision model outputs with rover sensor data to support terrain analysis.

2D Cafe Game | Team Programmer

Jun. 2024 - Nov. 2024

C#, Git, Unity, Unity Test Framework (UTF)

- Built core gameplay mechanics, in-game menus, and asset integration for a 2D cafe simulation.
- Coordinated weekly sprints and reviews, ensuring design alignment and timely feature delivery.
- Implemented UI and interactive elements, improving player usability and engagement.

Badminton Court Reservation System | Scrum Master

Sept. 2023 - Jan. 2024

Java, JavaScript, Spring Boot, Git, Jira, React.js, SQL

- Developed responsive front-end with React.js and Vite, improving load times and user experience.
- Applied Agile methodologies, reducing project timeline by 40% through efficient sprint planning.
- Implemented ARIES-based recovery to ensure system reliability.

TECHNICAL PROJECTS

Maya -> Unreal FBX Exporter Tool | Project

Jan. 2026

Python, Autodesk Maya API, Unreal Engine 5

- Built a Python tool automating FBX export from Maya to Unreal Engine.
- Automated batch export of 3D meshes while preserving naming conventions.

Distributed Routing System | Networking Project

Dec. 2024

Python, UDP, Bellman-Ford Algorithm

- Simulated distributed routing across multiple nodes, calculating shortest paths dynamically.
- Built real-time UDP communication for routing updates between devices.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, Golang, SQL, JavaScript, Kotlin

Games / Graphics Tools: Unity, Unreal Engine 5, Autodesk Maya, Adobe Suite

Frameworks: React.js, Node.js, MySQL, MongoDB, PostgreSQL

Tools: Git, Jira, Figma, VS Code, Eclipse

Other Skills: Video Editing, 3D Modeling, 3D Animation (Maya)
